EXPERIENCE

SDLC CORP. *Noida, India*

Kotlin Developer (Aug 2025 – current)

Full-Stack Mobile Engineering / Fintech Super App

- **Led complete architectural overhaul** of legacy fintech application, migrating to **Jetpack Compose** and establishing **clean architecture patterns**, resulting in a **scalable, maintainable codebase** supporting multiple business verticals.
- Architected and implemented **role-based access control (RBAC)** system supporting **5+ user types** (distributor, merchant, sub-distributor, individual user, selling point manager) with **distinct feature sets and permissions**.
- Owned **end-to-end development** of integrated super app platform combining **payments, e-commerce, and taxi booking** modules, coordinating with backend and design teams to deliver **seamless cross-module experiences**.
- **Improved app performance significantly** by optimizing critical rendering paths, reducing crashes, and implementing efficient state management, resulting in **enhanced responsiveness** and user retention.
- **Technologies:** Kotlin, Jetpack Compose, Ktor Client, Dagger Hilt, Room Database, WorkManager, Stripe SDK, FCM

Team Leadership / Platform Infrastructure

- Led Android development team, establishing **coding standards, architecture guidelines, and review processes** to maintain code quality across modules.
- Migrated networking layer from Retrofit to **Ktor Client** for improved performance and Kotlin-first architecture.
- Integrated critical platform services including **payment gateways (Stripe), push notifications (FCM), local persistence (Room DB), and background processing (WorkManager)**.
- **Technologies:** Team Leadership, CI/CD Integration, Payment Gateway Integration, Push Notification Systems

NS VENTURES *Mohali, India*

Mobile App Developer (February 2025 – August 2025)

- Owned **end-to-end development** of **4 mobile applications (Android + iOS)** and **2 web apps**, managing client requirements, architecture, implementation, and deployment.
- Built native Android apps with **Jetpack Compose/Kotlin** and cross-platform solutions using **Flutter**, delivering seamless experiences across mobile and web platforms.
- Architected **Firebase backend infrastructure** using **Node.js Cloud Functions**, implementing authentication, real-time databases, and cloud storage for production applications.
- Collaborated with **Python backend and AI/ML engineers** to integrate intelligent features into web applications, serving as technical liaison with international clients (Sweden).
- **Technologies:** Flutter, Kotlin, Jetpack Compose, Firebase, Node.js (Cloud Functions), Google Maps SDK, AI Integration

TECHNIA INFOTECH *Gurgaon, India*

Software Developer (January 2024 – February 2025)

- Architected and developed a **live-streaming social gaming platform** enabling creators to broadcast gameplay, interact with viewers through **real-time chat and emotes**, and facilitate **interactive gaming sessions** with voice call rewards.
- Implemented **video streaming infrastructure, live comment system, onboarding flows, and real-time engagement features** using **Jetpack Compose** with **MVI + Clean Architecture** patterns for maintainability and scalability.
- Integrated **payment gateways Razorpay** to monetize creator-viewer interactions and handle in-app transactions.
- **Improved app performance significantly** by refactoring legacy codebase, optimizing real-time data flows, and implementing efficient state management for live streaming scenarios.
- **Technologies:** Kotlin, Jetpack Compose, MVI + Clean Architecture, Video Streaming APIs, Socket.IO, WebRTC, Razorpay

EDUCATION

PANJAB UNIVERSITY *Chandigarh, India*

BS in Computer Application Score: 7.9 CGPA
